## License Activation

License Manager is included into Virto Web Part installation package. Please unzip and install it in order to run activation process.

**Note:** License Manager uses MMC 3.0. Try download and install Microsoft Management Console 3.0 for Windows Server 2003 from <http://www.microsoft.com/downloads/details.aspx?familyid=4C84F80B-908D-4B5D-8AA8-27B962566D9F&displaylang=en>

To activate the license go to “Start - All Programs – Virto Software – License Manager”.

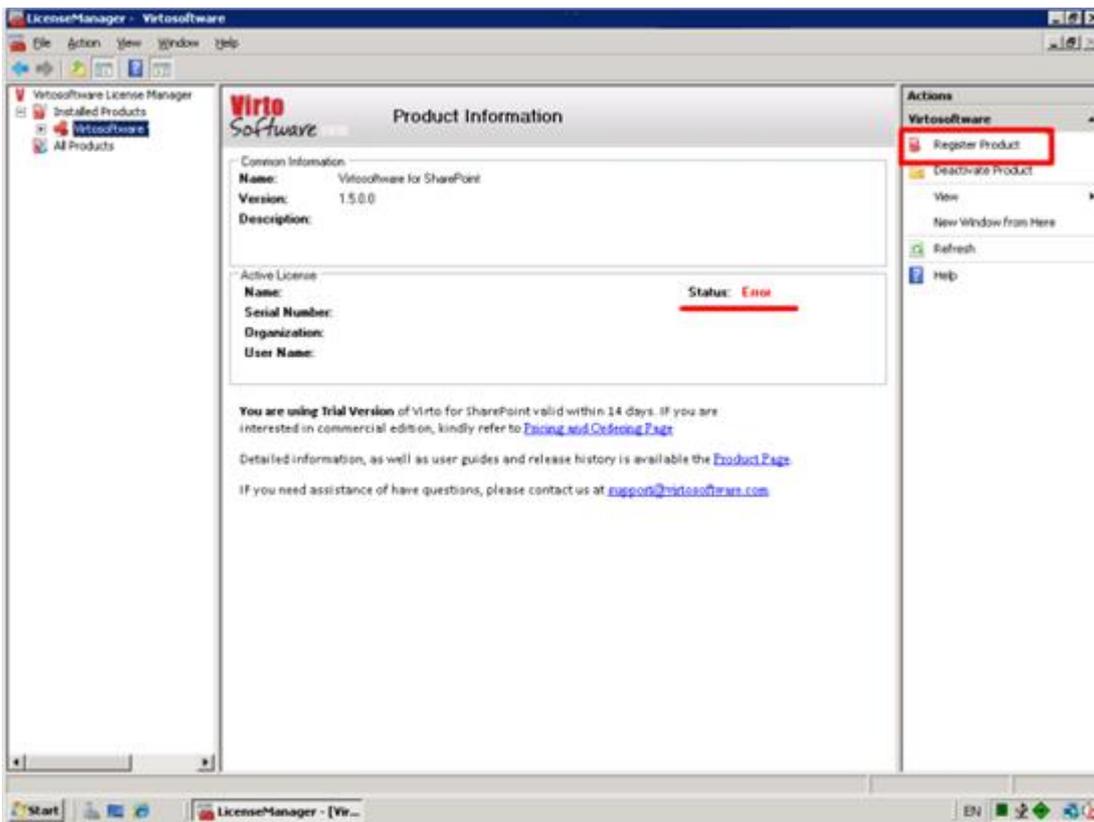

License Manager window will be displayed. Here you can find the required information about the product you want to register and installed Virto components.

Pay attention to the value of “Status” field:

- **Trial** – you are using trial version.
- **Error** – the trial period is expired.
- **Unlocked** – you have entered the serial number but have not activated the license yet.
- **Activated** – the license is activated.

To start registration click “Register Product” in the right block of the window.

Activation Wizard window will appear. “Click “Register” to activate the license. You can also click “More Info” to see more details about the product or “Buy Now” to purchase the product.

Now you must fill in the fields “Name”, “Organization” (not required), “Serial number” and “Email”. Then click “Register”.

**Register Your Software**

In order to continue you must register your copy of Virtosoftware for SharePoint. Registration is required to be eligible for updates and support.

[License Agreement](#)

Name \*

Organization

Serial Number \*

E-mail \*

During registration the license server will be notified. An active internet connection is required.

\* Indicates that you must fill in the field.

[Buy Now](#) [Register](#) [Iy](#)

Then you have to select which type of activation is appropriate for you: online activation or manual activation.

## Online Activation

Online activation requires Internet connection. Click “Activate online now”.

**Activate Your Software**

In order to continue you must activate your license. Activation verifies that you are using a fully licensed version of Virtosoftware for SharePoint and are eligible for updates and support.

6 of 7 days remaining

[Activate online now. Requires an active Internet connection.](#)

[Activate manually by entering a code.](#)

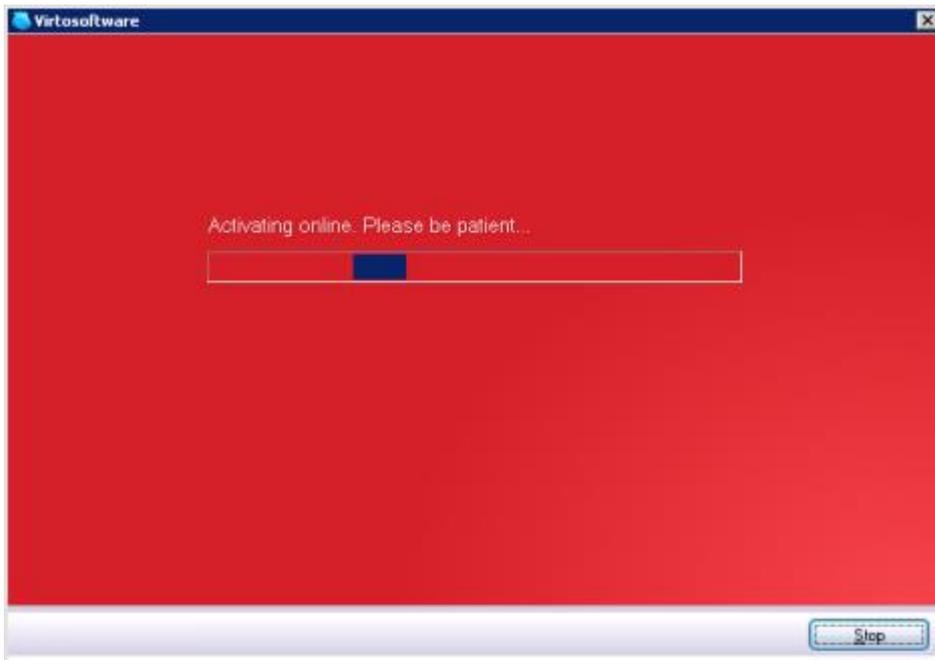

[Activate Later](#)

**!** You have 6 of 7 days remaining to activate Virtosoftware Workflow Activities Kit for SharePoint. If you do not complete activation some features may not work until you complete activation.

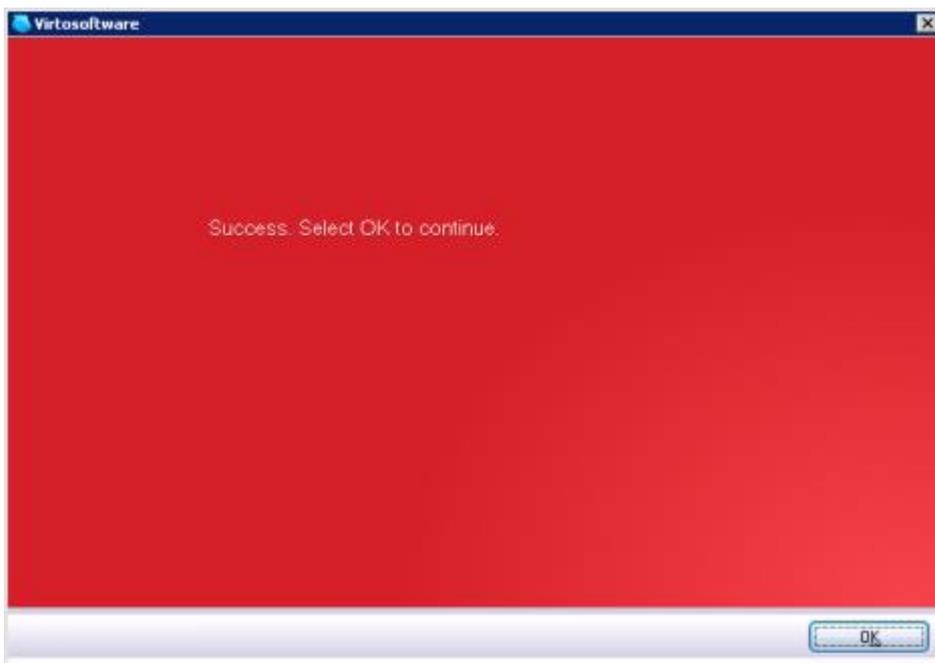

**WARNING:** Activating your license on this machine may prevent you from installing the software on additional machines. Please consult your licensing agreement for license usage and restrictions before continuing.

[License Agreement](#) [Tell me more about Activation](#) [Cancel](#)

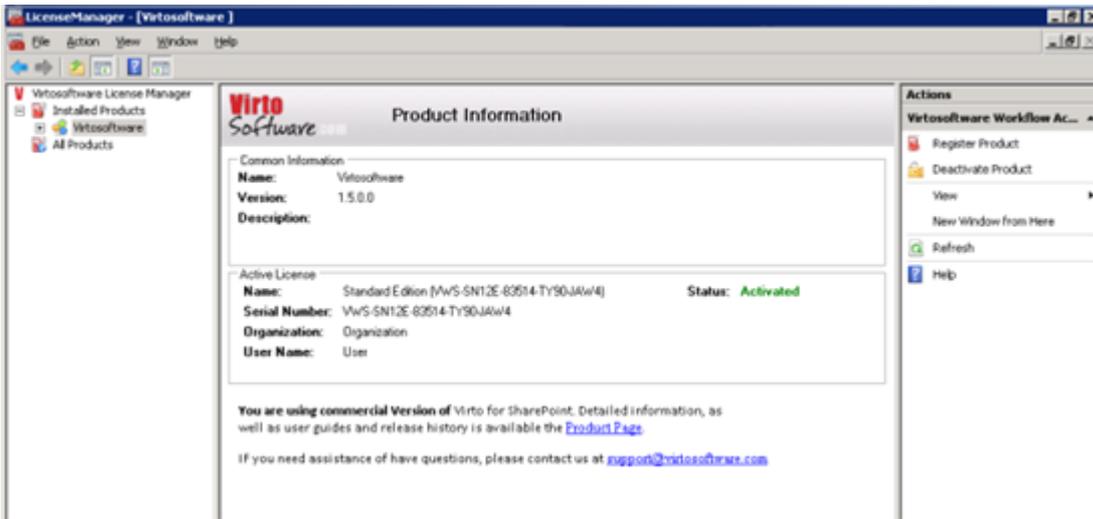

Now the registration is in process.

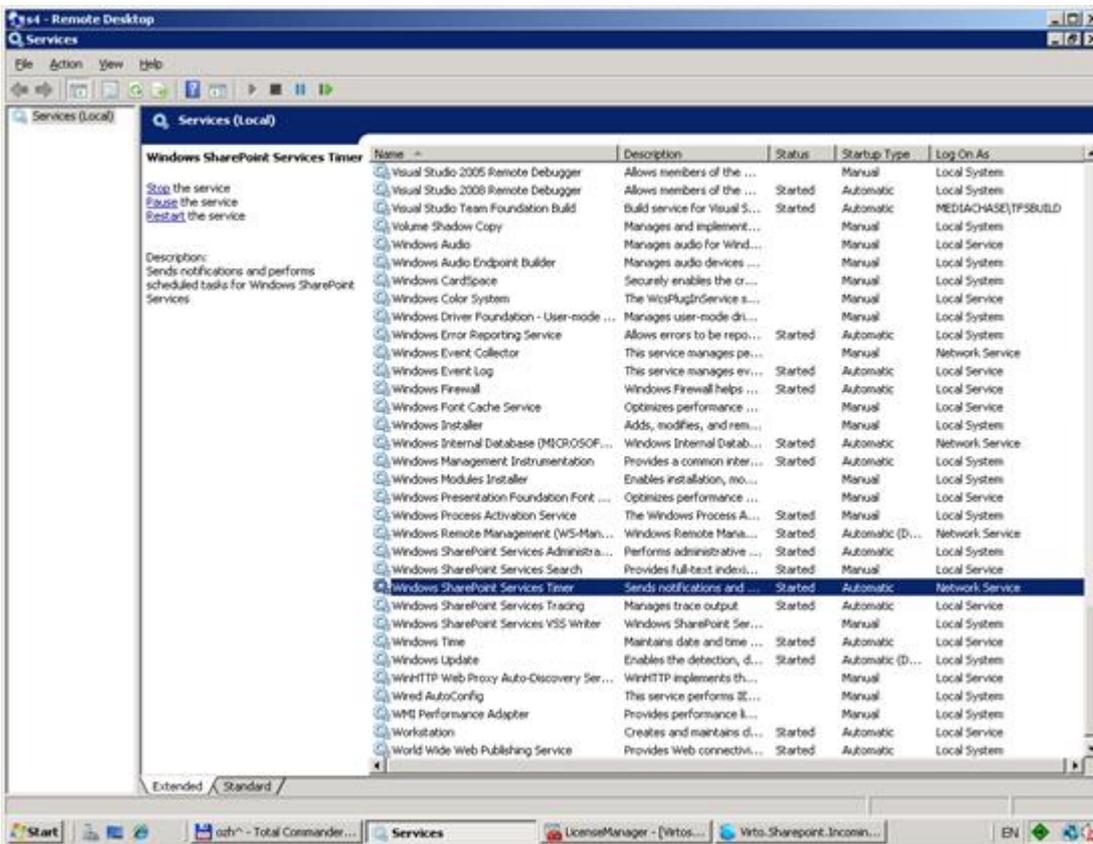

In case the activation is successfully finished, the following window will appear. Click "OK".

Now you can see the "Activated" status of your component in the "License Manager" window.

Note: after activation you must restart IIS and Windows SharePoint Services Timer.

You can use Command Manager commands:

**iisreset**

**net stop "Windows SharePoint Services Timer"**

**net start "Windows SharePoint Services Timer"**

## Manual Activation (Offline)

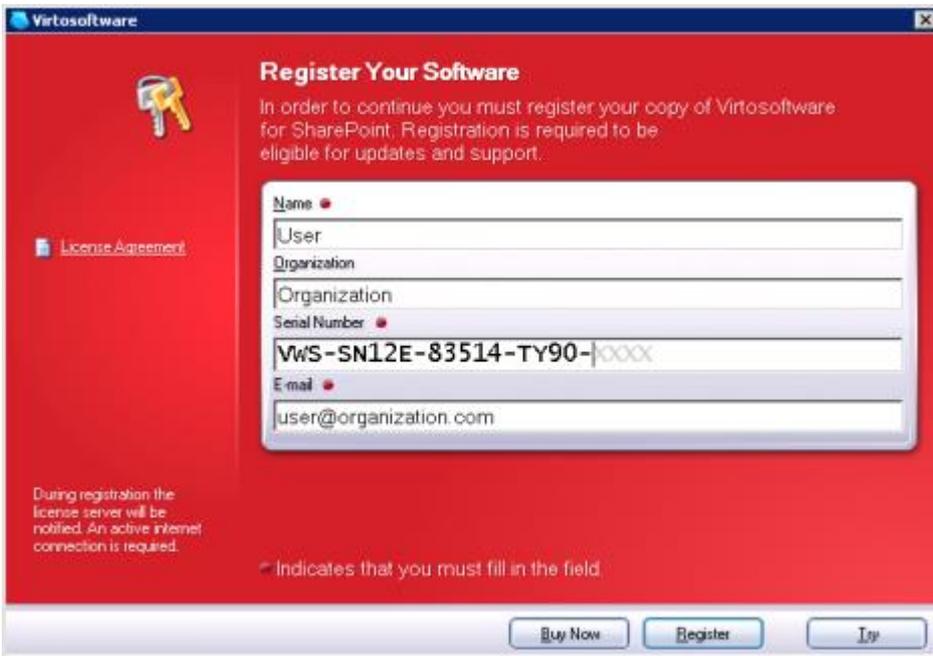

Manual activation does not require Internet connection. Click "Activate manually by entering

code”.

Type your serial number and machine code.

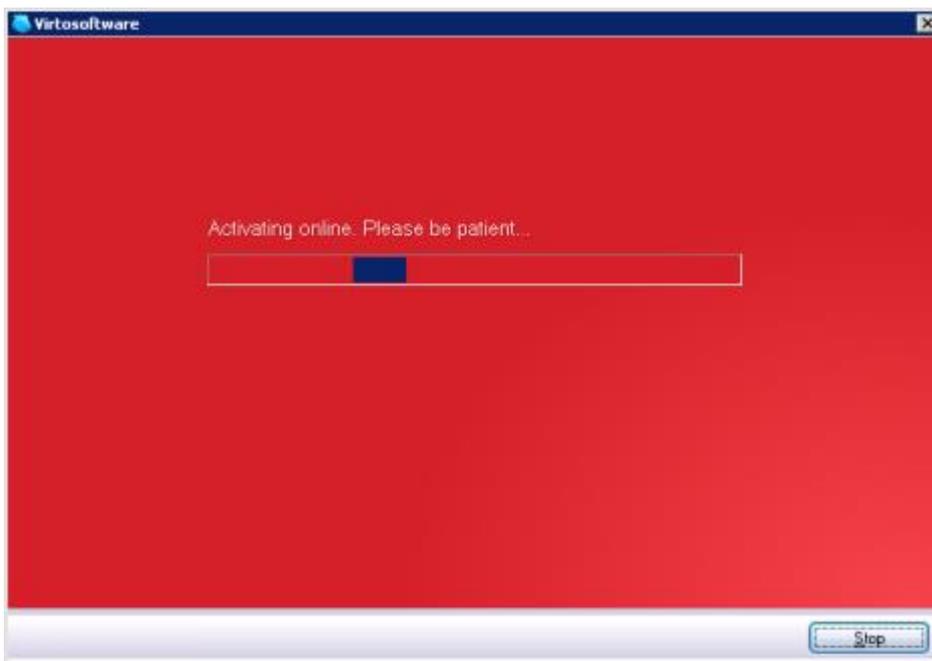

***Note:*** the codes on the picture are random. Use your personal codes and numbers.

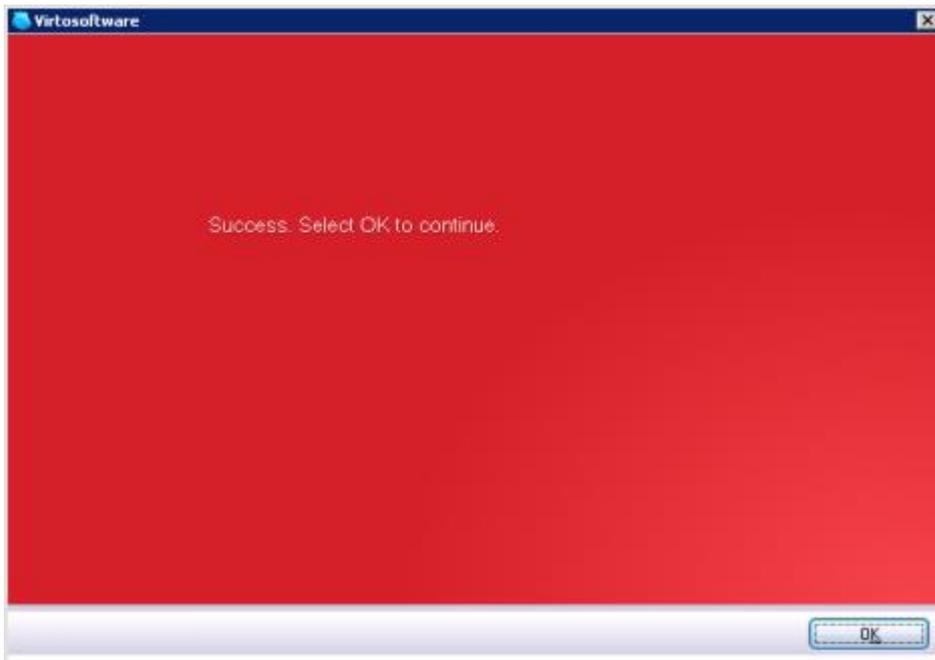

Contact us by phone or email (you can find our contacts on [virtossoftware.com](http://virtossoftware.com)) and get the activation code. Type this code in the “Activation Code” field as shown below. Then click “Activate”.

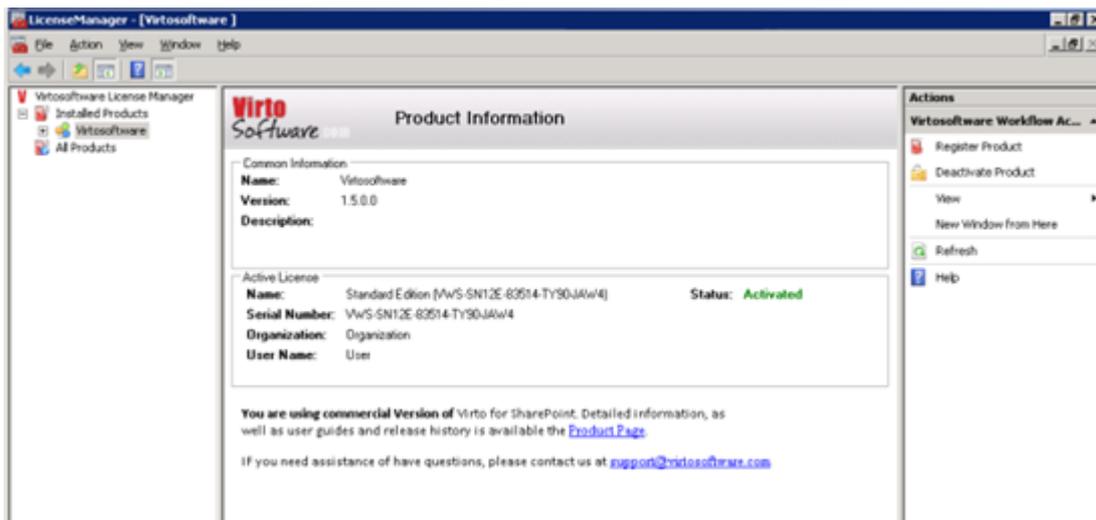

Now the registration is in process.

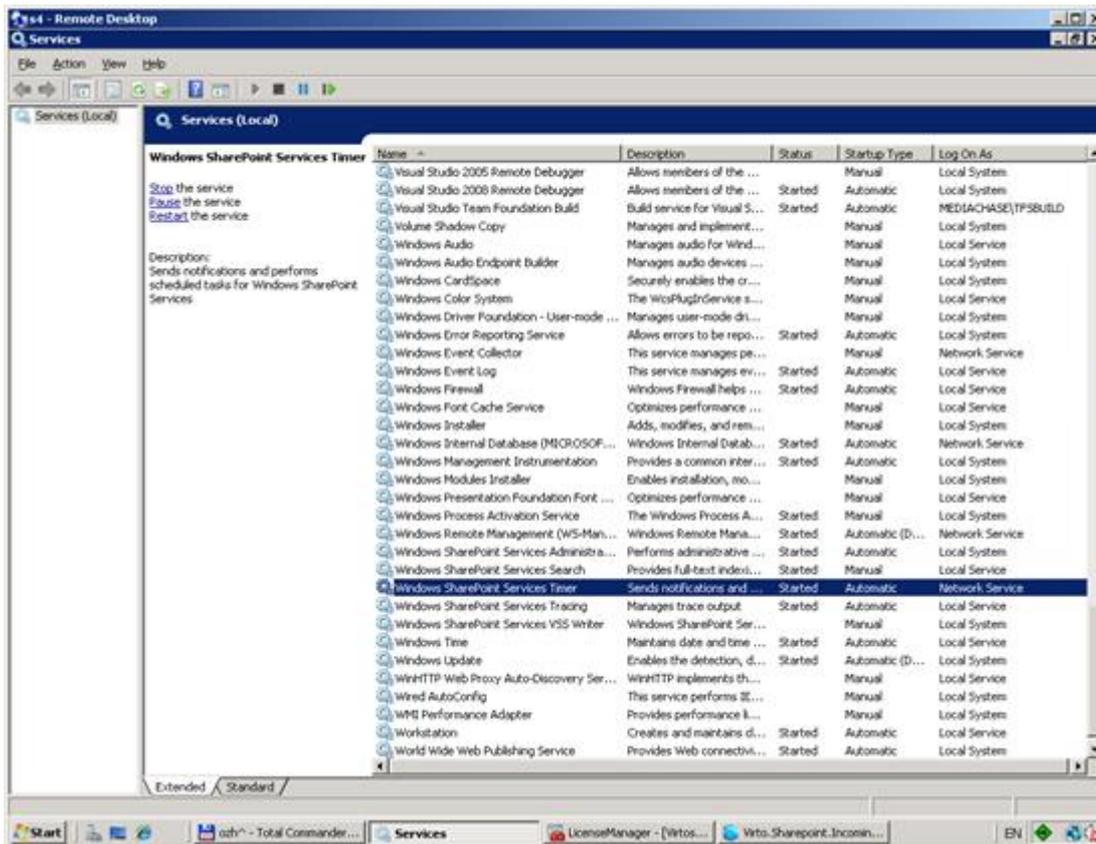

In case the activation is successfully finished, the following window will appear. Click "OK".

Now you can see the “Activated” status of your component in the “License Manager” window.

***Note:*** after activation you must restart IIS and Windows SharePoint Services Timer.

You can use Command Manager commands:

**iisreset**

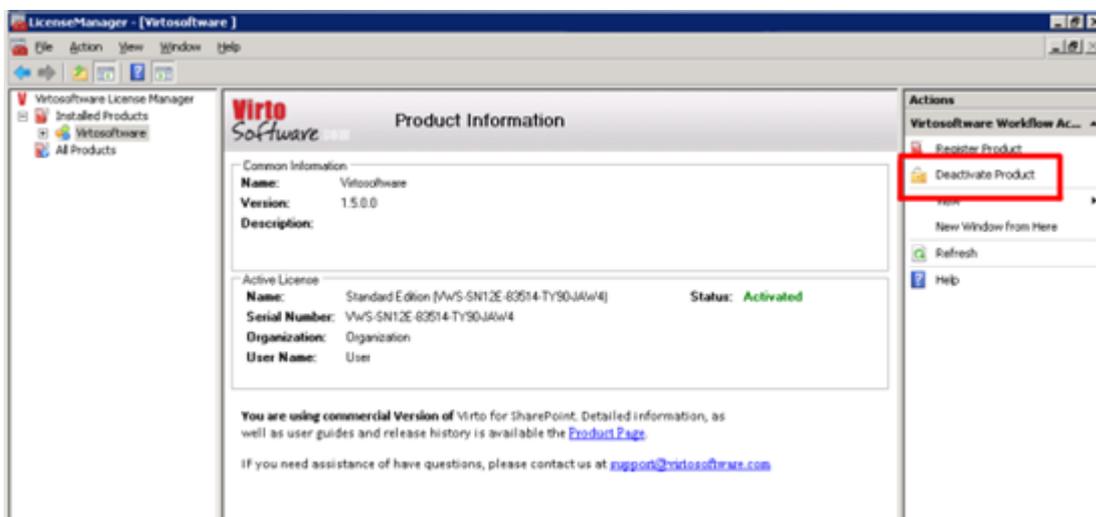

**net stop "Windows SharePoint Services Timer"**

**net start "Windows SharePoint Services Timer"**

## License Deactivation

Filed under: [alerts customizer](#) [\[Edit Tags\]](#)

In case you need to deactivate the license (for instance, if you want to install the component to another computer), click “Deactivate Product” in the right block of “License Manger” window.

The window of deactivation wizard will appear. Click “Deactivate”.

Click “Yes” to start deactivation process.

***Note: all the activation data will be removed after the deactivation.***

Use the displayed code for installation on another computer. And click “OK” to finish deactivation.

***Note: the code on the picture is random. Use your personal code.***
